INDEX TO VOLUME 22

Authors

A

Abdel-Khalik, S. I. 203
Abdel-Salam, Omar E. 1042
Abuaf, N. 1147
Acrivos, Andreas 417
Allen, D. W. 593
Allen, Gary L. 549
Annapurna, Nori 940
Anthony, Donald B. 625
Appel, Peter W. 979
Archer, Michael C. 1079
Auvil, Steven R. 564
Axtmann, Robert C. 817
Ayyash, S. Y. 603

B

Baer, A. D. 806
Bahrami, P. 194
Balakrishnan, Chander 207
Bankoff, S. G. 361
Beattie, D. 959
Beavers, G. S. 194
Bedford, A. 938
Beek, John 623
Benson, Montford S. 814
Bentwich, Michael 772
Bird, R. B. 203
Björnbom, Pehr H. 204
Block, Ulrich 582
Bolles, William L. 153
Book, Neil L. 55
Boura, André 94
Brill, James B. 615
Brink, J. A., Jr. 1152
Bromley, LeRoy A. 202, 533
Brown, Lee F. 942
Broyer, Ephriam 268
Brumfield, Larry K. 607
Bryant, R. A. A. 82, 959
Burkhart, Lawrence 1090
Butt, John B. 1
Butt, Muhammad Arif 196
Byers, Charles H. 872

C

Camero, Arthur A. 369
Campbell, J. R. 1050
Campbell, P. S. 828
Caskey, Jerry A. 203
Chan, A. F. 1006
Chandrasekaran, S. K. 828
Chang, Ching-Yuan 252
Chappelear, Patsy S. 191
Chawla, T. C. 283, 623
Chen, C. H. 463
Chen, Herbert T. 680
Cheng, Wai-Biu 471
Chiou, C. S. 947
Choi, C. Y. 1106
Choudhary, Manoj 600, 1021, 1027
Chung, Ying-Chee 691
Churchill, Stuart W. 264
Ciliberti, David F. 394, 1150
Clough, David E. 1097
Cohen, Robert E. 413
Collins, Dermot J. 610
Colton, Clark K. 1079, 1125, 1133
Cooney, David O. 921
Corcoran, William H. 691
Coughanowr, Donald R. 189
Coughlin, Robert W. 490, 730
Coulaloglou, C. A. 289
Crowe, C. M. 985
Cruz, Angel 832
Cruz-Saenz, G. F. 441
Cummings, Daniel L. 569
Cussler, E. L. 1006

D

Dadyburjor, Dady B. 785
D'Andrea, R. G. 923
Dang, Vi-Duong 925
Danner, Ronald P. 409, 759
D'Arcy, D. 1158
Davis, Stephen H. 813
Degaleesan, T. E. 456
Denn, Morton M. 209, 236, 958, 1158
Detz, Clifford M. 87
Ditl, Pavel 730
Doetsch, Ingo H. 882
Donnelly, G. J. 441
Doraiswamy, L. K. 415, 597
Duda, J. L. 175
Dudukovic, M. P. 894, 945, 953
Duffy, Geoffrey G. 750
Duffy, G. J. 1118
Dukler, A. E. 47, 449, 960

E

Ehrlich, Paul 463
Eldridge, Bradley D. 942
Eubank, Philip T. 399
Evans, D. Fennell 1006
Evans, Lawrence B. 414, 958

F

Fan, L. T. 680
Felder, K. M. 203, 724
Fenn, J. B. 405
Ferrell, J. K. 724
Finlayson, Bruce A. 331, 343
Fisher, Robert J. 236
Fogler, H. S. 799
Foss, Alan S. 1158
Friedly, John C. 872
Friedman, M. H. 407
Fryer, Colin 38
Furusaki, Shintaro 354, 814
Furzer, I. A. 1118

G

Gabor, John D. 413
Gaddy, J. L. 744, 1050
Gaines, L. D. 744
Gardner, Colin R. 1079
Garside, John 887
Gates, B. C. 576
Gauvin, W. H. 713
Gebhart, Benjamin 94
Gelibter, Marc 1142
Gerhard, E. R. 592
Glasser, David 772
Goldstein, L., Jr. 194
Gomez M., Alejandro 970
Gordon, R. J. 207, 947
Gorton, Charles W. 610
Grevillot, Georges 1055
Gross, Benjamin 701
Grossman, G. 623, 1033
Gruyaert, F. 985
Guin, James A. 252
Gürkan, Türker 484
Gutfinger, C. 1147
Guthrie, H. D. 203

H

Hall, Kenneth R. 399
Hamilton, Bruce K. 1079
Hanna, Owen T. 1142
Hanratty, Thomas J. 990
Harnish, Daniel F. 117
Hartman, Miloslav 490
Hashimoto, Nobru 944
Hassager, O. 203
Heck, Roland H. 477
Hegner, Bernd 582
Henry, Joseph D., Jr. 433
Henstock, William H. 990
Herskowitz, Mordechay 919
Heuckroth, M. W. 744
Hill, C. D. 938
Hill, F. B. 203
Himmelblau, David A. 569
Hiratsuka, S. 505, 513
Hirschfelder, J. O. 794
Hoelscher, H. E. 207, 456, 1158
Hoffman, Lee A. 324
Holman, Kermit L. 814
Homsy, George M. 168
Horne, R. M. 623
Howard, D. W. 794
Howard, Frank L. 815
Howard, Jack B. 625
Howell, J. A. 463
Hsieh, J. S. C. 498
Hsu, C. C. 66
Hsu, George C. 691
Huang, H. S. 206
Hughes, R. 192
Hughes, R. R. 851
Hughmark, G. A. 198
Hulburt, Hugh M. 604
Hwang, Sun-Tak 1000

I

Ichikawa, A. 539
Iinoya, Koichi 558
Irani, Cyrus A. 199
Ishii, Mamoru 283, 623

J

Jacob, Solomon M. 701
Jancic, Slobodan J. 887
Javdani, Kambiz 867
Jayaraman, Krishnamurthy 298, 309
Jeffrey, D. J. 417
Jo, J. H. 361

Titles

A

Activator Effects on Urease Kinetics . 1106
Active Catalyst for the Oxidation of Acetic Acid Solutions, An 919
Adsorption and Desorption of Particles and Their Chromatographic Separation 276
Adsorption of Nitric Oxide in Aqueous Slurries of Activated Carbon: Transport Rates by Moment Analysis of Dynamic Data 961
Advanced Control Practice in the Chemical Process Industry: A View From Industry (Journal Commentary) 27
Air Pollution Control and Industrial Production (Book Review) ... 413
Analysis of Carrier Facilitated Transport in Heterogeneous Media .. 1125
Analysis of Rectilinear Rivulet Flow 772
Analysis of Slow Reactions in a Porous Particle, An 1012
Application of h-Transformation for the Solution of Multicomponent Adsorption in Fixed Bed 498
Application of the Limiting Current Method to Mass Transfer in Packed Beds at Very Low Reynolds Numbers 979
Aqueous Environmental Chemistry of Metals (Book Review) 202
Axial Distriution of Reactivity inside a Fluid-Bed Contactor 354
Erratum 814

B

Basic Concepts of Spray Dryer Design 713
Benzoin and Benzoin Methyl Ether-Sensitized Photopolymerization of Styrene and Methyl Methacrylate: Quantum Yields and Mixing Effects (Erratum) 203

C

Calculation of Supersaturation Ratios of Flue Gas Scrubbing Slurries 403
Capture of Small Paramagnetic Particles by Magnetic Forces from Low Speed Liquid Flows 569
Catalyst Aging in a Process for Liquefaction and Hydrodesulfurization of Coal 576
Catalyst Effectiveness Factors for Complex Reaction Mechanisms 593
Chemical Absorption Kinetics Over a Wide Range of Contact Time: Absorption of Carbon Dioxide into Aqueous Solutions of Monoethanolamine 196
Chemical Process Economics, Second Edition (Book Review) 201
Cis-1, 4 Polymerization of Butadiene Initiated by $CoCl_2 \cdot 4C_5H_5N$-$(C_2H_5)_2AlCl$ 66
Coal Devolatilization and Hydrogasification (Journal Review) 625
Comparison of Enthalpy Prediction Methods, A 409
Comprehensive Correlating Equation for Forced Convection from Flat Plates, A 264
Compressibility Factors for the Hydrogen-Methane System 191
Computer Aided Data Book of Vapor-Liquid Equilibria (Book Review) 957
Computer Model for Tubular High-Pressure Polyethylene Reactors. 463
Constitutive Equation for Vapor-Drift Velocity in Two-Phase Annular Flow 283
Erratum 623
Continuous Production of Polystyrene in a Tubular Reactor: Part 1 (Erratum) 203
Convective Instabilities in Porous Media with Through Flow 168
Coordinate-Transformation Method for the Numerical Solution of Nonlinear Minimum-Time Control Problems, A (Erratum) ... 414
Corotational Rheological Models and the Goddard Expansion (Erratum) 203
Correlation of Liquid Heat Capacities with a Four-Parameter Corresponding States Method 759

D

Denitrification Kinetics in Packed Beds 851
Design and Control of Chemical Process Systems (Book Review) 958
Design of an Ionic Lattice for Optimum Cation Diffusion 785
Development and Application of a Simulation Model for Three-Phase Distillation 582
Dialysis Study of Diffusion in a Flowing Suspension 691
Diffusion of Hydrocarbons in 13X Zeolite 882
Diffusivities in Catalyst Pellets with Bidisperse Pores 944
Digital Monitoring and Estimation of Polymerization Reactors 361
Drag Reduction Fundamentals (Erratum) 398
Drag Reduction in Two-Phase Annular-Mist Flow of Air and Water 615
Drop Size Distributions and Coalescence Frequencies of Liquid-Liquid Dispersions in Flow Vessels 289
Dual Functional Solid Liquid Separation Process Based on Filtration and Settling, A 433
Dynamics of Aerosol Coagulation and Condensation 840
Dynamics and Control of Continuous Distillation Units (Book Review) 1156

E

Effect of Cross Sectional Pore Shape on Knudsen Diffusion in Porous Materials 942
Effect of Dissociation and Association on Enzyme Reaction Kinetics .. 921
Effect of Distributor Plate-to-Bed Resistance Ratio on Onset of Fluidized-Bed Channeling 590
Effect of Flow Maldistribution on Conversion in a Catalytic Packed-Bed Reactor: Part I. Analysis 1021
Part II. Experimental Studies .. 1027
Effect of Inclusion of Delayed First-Order Hold on the Stability of First-Order Sampled Data Proportional Control System 189
Effect of a Pure Surfactant on the Damping of Liquid-column Oscillations, The 603

Effect of Surfactant on the Terminal and Interfacial Velocities of a Bubble or Drop, The 695
Effective Computational Algorithm for Suboptimal Singular and/or Bang-Bang Control:
Part I. Theoretical Developments and Applications to Linear Lumped Systems 505
Part II. Applications to Nonlinear Lumped and Distributed Systems 513
Effectiveness Factors in Gas-Liquid Reactions: the General n^{th} Order Case 597
Effects of Surface Tension and Gravity Forces in Determining the Stability of Isothermal Fiber Spinning 923
Efficient General Purpose Method for the Integration of Stiff Ordinary Differential Equations, An 594
Electropolarization Chromatography 779
Empirical Method for Evaluating Critical Molar Volumes, An ... 950
Enhancement and Effectiveness Factors in Gas-Liquid Absorbers and Reactors 604
Enzymatic Regeneration of ATP:
I. Alternative Routes 1079
Equilibrium Properties of Fluid Mixtures (A Bibliography of Data on Fluids of Cryogenic Interest) (Book Review) 813
Equilibrium Staged Parametric Pumping:
I. Single Transfer Step per Half-cycle and Total Reflux—The Analogy with Distillation .. 1055
Equivalence of the Spatial and Temporal Formulations for the Linear Stability of Falling Film Flow, The 934
Evaluation of a Rapid Technique for Measuring the Diffusion Coefficients of Small Molecules 389
Examination of the Adaptive Random Search Technique, An 744
Existential Pleasures of Engineering, The (Book Review) 957
Experimental Investigation of Models for Fluidized Bed Catalytic Reactors 38
Experimental Observations Concerning the Diffuse, Light Intensity Distribution Model 811
Experimental Study of Diffusion From a Line Source in a Turbulent Boundary Layer, An 610
Experimental Study of the Residence Time Distribution in Plasticating Screw Extruders 122
Explaining Solubilization Kinetics .. 1006
Extensional Viscosity and Recoil in Highly Dilute Polymer Solutions (Erratum) 207

F

Filtration Post-Treatment Processes (Book Review) 620
Financial Decision Making in the Process Industry (Book Review) 203
Finite Amplitude Equilibrium Waves on the Surface of Nonvertical Falling Films 867
Flow Behavior of Power Law Fluids in an Annulus 617
Flow Model for Gas Movement in Spouted Beds, A 674
Flow Through Permeable Beds Consisting of Layers of Different Size Spheres 194
Flows of Nonlinear Fluids Through Porous Media 736
Fluid-Bed Heat Transfer (Book Review) 413
Fluid Mechanics and Heat Transfer of Injection Mold Filling of Thermoplastic Materials, The .. 661
Fluid and Particle Entrainment Into Vertical Jets in Fluidized Beds . 315
Friction Coefficients for Bubbly Two-Phase Flow in Horizontal Pipes 82

G

Geothermal Chemical Engineering 817
Global Minimization of a Cooled Reactor by Using a Posynomial Lower Bounding Function 685
Growth and Dissolution of Potash Alum Crystals in the Subsieve Size Range 887

H

Handbook of Enzyme Biotechnology (Book Review) 411
Handbook of Plastics and Elastomers (Book Review) 413
Heat Transfer and Curing in Polymer Reaction Molding 268
Heat Transfer in a Packed Bed 198
High Peclet Number Mass Transfer to a Sphere in a Fixed or Fluidized Bed 1147
Hydrodynamic Resolution of Optical Isomers, The 794
Hydrogenolysis Kinetics of Ethane and n-Pentane Over Unsupported Copper/Nickel and Platinum Catalysts 1112

I

Improvement of the Simple Model for Rotary Flow Cyclones, An .. 1150
Improving Efficiency of Electrostatic Precipitation by Physicochemical Modification of the Electrical Resistivity of Fly Ash 730
Instabilities in Polymer Processing (Journal Review) 209
Interfacial Drag and the Height of the Wall Layer in Annular Flows, The 990
Interfacial Phenomena in Falling Film Evaporation of Natural Seawater 533
Interferometric Technique for the Study of Steady State Membrane Transport, An 175

L

Lagrangian Simulation of Dispersion in Turbulent Shear Flow with a Hybrid Computer 449
Linear Hydrodynamic Stability of Film Flow Down a Vertical Cylinder, The 930
Liquid Holdup and Dispersion in Trickle-Bed Reactors 953
Long Range Attractive Forces for Hydrogen-Light Hydrocarbon Pairs 405
Lumping and Reaction Scheme for Catalytic Cracking, A 701

M

Mass Transfer (Book Review) 621
Mass Transfer From Swarms of Bubbles or Drops With Chemical Reactions in Continuous Phase . 925
Mass Transfer of Dissolved Gases Through Tubular Membrane .. 1000
Mass Transfer and Internal Circulation in Forming Drops 1090
Mass Transfer to Drops Moving Through Power Law Fluids in the Intermediate Reynolds Number Regions 484
Mathematical Modeling of Monolithic Catalysts 477
Mathematical Modeling and Optimization of the Dehydrogenation of Ethylbenzene to Form Styrene 1097
Mathematical Models of the Monolith Catalytic Converter:
Part I. Development of Model and Application Orthogonal Collocation 331
Part II. Application to Automobile Exhaust 343
Mathematical Theory of Diffusion and Reaction in Permeable Catalysts, The (Book Review) 201
Measurements of the Effect of Suspended Small Particles on Turbulent Mixing in Pipe Fow 401
Mechanism Supported by Extensive Experimental Evidence to Explain High Heat Fluxes Observed During Nucleate Boiling, A 246
Melting, Freezing, and Channeling Phenomena in Ice Counterwashers 1033
Method of Moments for Measuring Diffusivities of Gases in Polymers, A 724
Methodology for Simultaneous Optimization with Reliability: Nuclear PWR Example 1050
Miscibility Considerations in the System Propane-Hexatriacontane . 199
Mixing—Principles and Applications (Book Review) 412
Mixture Theory Formulation for Particulate Sedimentation, A 938
Model for Predicting Flow Regime Transitions in Horizontal and Near Horizontal Gas-Liquid Flow, A 47
Errata 414, 960
Model for the Residence Time Distribution of Liquid Phase in Trickle Beds, A 612
Moldeling of Hematite Reduction with Hydrogen Plus Carbon Monoxide Mixtures:
Part I. The Behavior of Single Pellets 1064

Part II. The Direct Reduction Process in a Shaft Furnace Arrangement 1072
Models for Flow Systems and Chemical Reactors (Book Review) .. 412
Multicomponent Film Model Incorporating a General Matrix Method of Solution to the Maxwell-Stefan Equations, A 383
Multicomponent, Multiphase Vapor-Liquid Equilibrium Data from the Method of Intersecting Isochores 399
Multipass Flow Distribution and Mass Transfer Efficiency for Distillation Plates 153
Multiple Minima in a Fluidized Reactor-Heater System 680

N

New Tracer Method for Determination of Liquid-Solid Contacting Efficiency in Trickle-Bed Reactors, A 894
Note on Gas Solid Noncatalytic Reactions, A 945
Nucleation Effects in the Dropwise Condensation of Steam on Electroplated Gold Surfaces 87

O

On the Applicability of the Linear Stability Theory 937
On the Dynamics of Fluid Interfaces 872
On the Extension of the Model of Matrix Acid Simulation to Different Sandstones 799
On the Fate of Fuel Nitrogen During Coal Char Combustion 102
On the Importance of the Inertial Terms in the Modeling of Flow Maldistribution in Packed Beds 600
On the Optimization by Boundary Control of Tubular Reactors with Catalyst Decay 985
On Reversible Adsorption of Hydrosols and Repeptization 1145
Onset of Draw Resonance During Isothermal Melt Spinning: A Comparison Between Measurements and Predictions 441
Optimal Design of Pressure Relieving Piping Networks by Discrete Merging 471
Optimal Feedback Control of Time-Delay Systems 140
Oxidation of Acetic Acid Solutions in a Trickle-Bed Reactor 159
Oxidation of Naphthalene in Packed Bed Reactor with Catalyst Activity Profile: A Design Scheme for Improved Reactor Stability and Higher Product Yield 808

P

Particle Attrition in Shear Flow of Concentrated Slurries 765
Particle Size Measurement: Second Edition (Book Review) 202
Performance of Rotary Flow Cyclones 394
Periodic Cycling of Plate Columns: Discrete Residence Time Distribution 1118
Periodic Sublayer and Heat Transfer to High Prandtl Number Fluids, The 806
Pollution Engineering Practice Handbook (Book Review) 203
Polymer Conversion (Book Review) 201
Polymer Engineering (Book Review) 621
Practical Realizations in Process Modeling:
Part I. A New Approach to Practical Realization 298
Part II. The Approximation Problem 309
Prediction of Transport Processes Within Porous Media: Diffusive Transport Processes Within Anisotropic or Isotropic Swarms of Nonspherical Particles 182
Principles of Microbe and Cell Cultivation (Book Review) 621
Process Design in a Dynamic Environment:
Part I. A Decomposition Technique to Study the Stability of Chemical Engineering Systems . 855
Progress Toward the a Priori Determination of Catalytic Properties (Journal Review) 1
Pump Handbook (Book Review) .. 1156

R

Reaction of Sulfur Dioxide with Limestone and the Grain Model 490
Relationships Between Velocity Profiles and Drag Reduction in Turbulent Fiber Suspension Flow . 750
Rheological Properties of Suspensions of Rigid Particles, The (Journal Review) 417
Rheometry (Book Review) 414
Role of n-Butane in Hydrate Formation, The 656

S

Scopolamine Permeation Through Human Skin In Vitro 828
Secondary Nucleation of Ice in Sugar Solutions and Fruit Juices 131
Secondary Nucleation of Two Fast Growth Systems in a Mixed Suspension Crystallizer: Magnesium Sulfate and Citric Acid Water Systems 110
Selection of Design Variables in Systems of Algebraic Equations, The 55
Selective Hydrogenation and Mass Transfer in a Fixed-Bed Catalytic Reactor with Gas-Liquid Concurrent Upflow 904
Separation of Nonlinearly Sorbing Solutes by Parametric Pumping 369
Separation Sequences Synthesis by a Predictor Based Ordered Search 970
Shear Viscosity of Native and Enzyme Hydrolyzed Amioca Starch Pastes 832
Simple Method of Calculating Effectiveness Factors for Heterogeneous Catalytic Gas-Solid Reactions, A 192
Simulation of an Electrochemical Carbon Dioxide Concentrator .. 1042
Solar Heating and Cooling (Book Review) 620
Solid Phase Reactions Under Nonadiabatic Conditions 376
Solubilities of Ethylene and Other Organic Solutes in Liquid, Low-Density Polyethylene in the Region 124° to 300°C 74
Solubility of Gases and Liquids in Molten Polystyrene 117
Solution Procedures for Indexed Equation Sets: Structural Considerations 549
Some Performance Characteristics of Liquid Phase Spray Columns .. 456
Sorption of Oxygen, Nitrogen, Carbon Monoxide, Methane, and Binary Mixtures of these Gases in 5A Molecular Sieve 753
Stability of Reaction and Transport Processes (Book Review) 813
Stability of a Vertical Flow Which Arises From Combined Buoyancy Modes, The 94
Static Electrification of Particles in Gas-Solids Pipe Flow, The 558
Steady State Diffusion of Oxygen in Red Blood Cell and Model Suspensions 1133
Steady and Unsteady State Analysis of a Simple Gas Centrifuge, The 564
Steam and Air Tables in SI Units (Book Review) 620
Studies in Chemical Process Design and Synthesis:
Part II. Optimal Synthesis of Dynamic Process Systems with Uncertainty 539
Surface Reaction with Combined Forced and Free Convection .. 252

T

Test Particle Approach to Flow Classification for Viscoelastic Fluids, A 910
Theoretical Study of Pressure Drop for Non-Newtonian Creeping Flow Past an Assemblage of Spheres, A 259
Theory of Isothermal Melt Spinning and Draw Resonance, A 236
Thermal Conductivity of Liquid Mixtures 927
Thermodynamics of Fluids (Book Review) 814
Trajectory Analysis of Deep-Bed Filtration with the Sphere-in-Cell Porous Media Model 523
Transient Diffusion in Solids with a Bipore Distribution 147
Transport Phenomena in Aqueous Solutions (Book Review) 202
Transport Through a Growing Boundary Layer to a Permeable Wall 407
Turbulence in Mixing Operations (Book Review) 814
Turbulent Drag Reduction in Dilute Fiber Suspensions: Mechanistic Considerations 669

Turbulent Mass Transfer in Jet Flow and Bubble Fow: A Reappraisal of Levich's Theory 607
Turbulent Mixing in Nonreactive and Reactive Flows (Book Review) 813
Turbulent Non-Newtonian Transport in a Circular Tube 1142

U

Unified Treatment of Drainage, Withdrawal, and Post Withdrawal Drainage with Inertial Effects, A 940

V

Velocity Measurements in Two-Phase Bubble-Flow Regime with Laser-Doppler Anemometry ... 1152
Vortex Inhibition: Velocity Profile Measurements 947

Subjects

A

Absorbers, gas-liquid, enhancement and effectiveness factors in 604
Absorption, of carbon dioxide into monoethanolamine 196
Acetic acid, oxidation of, catalyst for 919
Acetic acid solutions, oxidation of in trickle-bed reactor 159
Acidization, of sandstones, model of 799
Adenosine 5'—triphosphate, enzymatic regeneration of 1079
Adsorption, of particles, rate of 276
Adsorption, multicomponent, application of h-transformation for solution of in fixed bed 498
Aerosols, growth of, effect of coagulation and condensation on 840
Algorithm, for suboptimal singular and/or bang-bang control 505, 513
Amino acids, effect on urease kinetics 1106
Amioca starch paste, shear viscosity of 832

B

Beds, spouted, gas movement in 674
Bipore distribution in solids, transient diffusion in 147
Blood, Oxygen diffusion in 1125, 1133
Boundary layer, turbulent, diffusion from line source in 610
Boundary layers, transport through to permeable wall 407
Bubble-flow, two phase, velocity measurements in 1152
Buoyancy force, mass transfer induced 94
Butadiene, cis-1,4 polymerization of 66
Butadiene, effect of catalyst composition on polymerization of 66
n-Butane, role of in formation of hydrates . 656

C

Carbon dioxide, absorption into monoethyanolamine 196
Carbon dioxide concentrator, electrochemical simulation of 1042
Carbon monoxide, oxidation of over platinum containing monoliths 477
Catalyst aging, in process for liquefaction and hydrodesulfurization of coal . 576
Catalyst composition, effect of on butadiene polymerization 66
Catalyst effectiveness factors, for complex reaction mechanisms 593
Catalyst pellets, diffusivities in 944
Catalysts, behavior of 1
Catalysts, monolithic, mathematical modeling of 477
Catalytic converter, monolith, mathematical models of 331, 343
Catalytic cracking, fluid, kinetic model of 701
Catalytic properties 1
Centrifuge, gas, operating theory of 564
Channeling, in fluidized bed 590
Chemical engineering systems, stability of 855
Chromatography, electropolarization, for fractionation of protein mixtures 779
Chromatography, potential-barrier, separation by 276
Citric acid and magnesium sulfate, secondary nucleation of 110
Coagulation, of aerosols 840
Coal, devolatilization and hydrogasification of 625
Coal, liquefaction and hydrodesulfurization of 576
Coal char combustion, fate of nitrogen fuel in 102
Coal particle attrition, in Couette flow 765
Coalescence frequencies, in agitated vessel 289
Columns, plate, periodic cycling of 1118
Compressibility factors, for hydrogen—methane system 191
Condensation, of aerosols 840
Contactor, fluid-bed, axial distribution of reactivity in 354
Control, of industrial chemical processes 27
Control, optimal feedback, of time-delay systems 140
Control, suboptimal, singular and/or bang-bang, computational algorithm for 505, 513
Control system, effect of inclusion of delayed first-order hold on stability .. 189
Convection, effect on surface reaction 252
Convection, forced, from flat plates 264
Convective instabilities, in porous media 168
Corresponding states method, use in correlation of liquid heat capacities 759
Cost, minimum, of cooled reactor 685
Cost design, minimum, of single-reaction fluidized bed reactor system 680
Critical volumes 950
Crystallizer, mixed suspension, secondary nucleation of 110
Crystals, growth of, in small size range 887
Curing, in polymer reaction molding ... 268
Cyclones, rotary flow, model for 1150
Cyclones, rotary flow, performance of 394

D

Denitrification, biological, in packed beds 851
Design variables, optimum, selection by solution mapping . 55
Desorption, of particles, rate of 276
Detergent solutions, solubilization rates of fatty acids in 1006
Devolatilization, of coal 625
Differential equations, stiff, integration of 594

Diffusion,
from line source in turbulent boundary layer 610
Diffusion,
in flowing suspension 691
Diffusion,
in turbulent shear flow, model of 449
Diffusion,
of hydrocarbons in 13X zeolite . 882
Diffusion, cation,
design of ionic lattice for 785
Diffusion, Knudsen,
in porous materials 942
Diffusion, steady state,
in reactive heterogeneous media 1125
Diffusion, transient,
in solids with bipore distribution 147
Diffusion coefficients,
of sucrose, glycol and glycine in water 389
Diffusivities,
in catalyst pellets 944
Diffusivities,
of gases in polymers 724
Dispersion,
in trickle-bed reactors 953
Distillation, three-phase,
simulation model for 582
Distillation column segment,
solution procedure for 549
Distillation trays, multipass,
model for prediction of flow distribution and mass transfer efficiency of 153
Distribution model, light intensity 811
Drag, interfacial,
in annual flows 990
Drag reduction,
in mist flow of air and water ... 615
Drag reduction, turbulent,
in dilute fiber suspensions 669
Drainage,
of liquid over flat plate 940
Draw resonance 236
Draw resonance,
onset of during melt spinning .. 441
Drop size distributions,
in agitated vessel 289
Drops,
effect of surfactant on velocities of 695
Drops,
effect on mass transfer of internal circulation in 1090
Dropwise condensation,
effect of nucleation on 87
Dryers, spray,
design of 713
Dynamic properties,
of fluid interfaces 872

E

Effectiveness factors,
calculation of for heterogeneous gas-solid reactions 192
Effectiveness factors,
in gas-liquid reactions 597
Effectiveness factors, catalyst,
for complex reaction mechanisms 593
Efficiency, contacting,
of trickle-bed reactors 894
Electrochemical concentration,
use on carbon dioxide 1042
Enantiomorphic crystal pairs and enantiomorphs, separation of .. 794
Energy, geothermal 817
Enthalpy,
comparison of prediction methods for 409
Entrainment,
into vertical jets in fluidized beds 315
Enzyme reaction kinetics 921
Enzymes,
use in ATP regeneration 1079
Equation sets,
solution procedure for 549
Ethane,
hydrogenolysis kinetics of 1112
Ethylbenzene,
dehydrogenation of, mathematical model of 1097
Ethylene,
hydrogenation of 354
Ethylene,
solubility of in polyethylene ... 74
Evaporation,
of seawater 533
Exhaust, automobile,
mathematical models for monolith catalytic converter used for . 343

F

Falling films,
equilibrium waves on 867
Fatty acids,
solubilization rates in detergent solutions 1006
Fiber spinning,
stability of 923
Fibers,
suspensions of, turbulent flow of 750
Film flow,
linear stability of 934
Film flow,
stability of down vertical cylinder 930
Film thickness profiles 940
Filter, dual functional 433
Filtration, deep-bed,
trajectory analysis of 523
Flow,
in packed beds, modeling of 600
Flow,
in pipe, turbulent mixing in 401
Flow,
of viscoelastic fluids 910
Flow,
through permeable beds 194
Flow,
annular 990
Flow, annular-mist,
drag reduction in 615
Flow, creeping non-Newtonian,
pressure drop in 259
Flow, film,
linear stability of 934
Flow, film,
Stability of down vertical cylinder 930
Flow, gas-liquid, horizontal,
model for predicting flow regime transitions in 47
Flow, injection,
of thermoplastic materials 661
Flow, rectilinear rivulet 772
Flow, turbulent shear,
model of diffusion in 449
Flow, two-phase annular,
vapor drift velocity in 283
Flow, two-phase bubbly,
friction coefficients for 82
Flow, vertical,
stability of when resulting from combined buoyancy modes .. 94
Flow distribution,
of multipass distillation trays, model for prediction of 153
Flow maldistribution,
effect on conversion in catalytic packed-bed reactor 1021, 1027
Flue gases,
scrubbing of 403
Fluidized bed,
channeling in 590
Fluidized bed catalytic reactors,
models for 38
Fluidized bed reactors,
minimum cost design of 680
Fluidized beds,
entrainment into vertical jets in . 315
Fluids, high Prandtl number,
periodic sublayer and heat transfer to 806
Fluids, nonlinear,
flow of through porous media .. 736
Fluids, power law,
mass transfer in 484
Fluids, viscoelastic,
flow of 910
Fly ash,
modification of resistivity of 730
Freeze crystallization,
use of ice counter-washers in 1033
Friction coefficients,
for bubbly two-phase flow in horizontal pipes 82

G

Gas centrifuge,
operating theory of 564
Gases,
diffusivities of in polymers 724
Gases,
movement in spouted beds 674
Geothermal energy 817
Glycine, sucrose and glycol,
diffusion coefficients of in water 389
Glycol, glycine and sucrose,
diffusion coefficients of in water 389
Grain theory,
application to reaction of sulfur dioxide with limestones 490

H

h-Transformation,
application to solution of multicomponent adsorption in fixed bed 498
Heat capacities, liquid,
correlation of 759
Heat transfer,
in nucleate boiling 246
Heat transfer,
in packed beds 198
Heat transfer,
in polymer reaction molding ... 268
Heat transfer,
to high Prandtl number fluids .. 806

Heat transfer coefficients,
dropwise condensation, for
steam on gold surfaces 87
Hematite reduction,
modeling of 1064, 1072
Hexatriacontane-propane system,
miscibility in 199
Holdup, liquid,
in trickle-bed reactors 953
Hydrates,
role of n-butane in formation of 656
Hydrocarbon, light-hydrogen pairs,
long range attractive forces for . 405
Hydrodynamics,
of multipass distillation trays,
model for prediction of 153
Hydrogasification,
of coal 625
Hydrogen-light hydrocarbon pairs,
long range attractive forces for . 405
Hydrogen-methane system,
compressibility factors for 191
Hydrogenation,
in catalytic reactor 904
Hydrogenolysis kinetics
of ethane and n-pentane 1112
Hydrosols,
reversible adsorption
of 1145

I

Ice,
secondary nucleation of in sugar
solutions and fruit juices 131
Ice counterwashers 1033
Interfaces, fluid dynamic 872
Iron, sponge,
production of by direct
reduction

K

Kalman filters,
performance of..... 361
Knudsen diffusion,
in porous materials 942

L

Laser-Doppler anemometry 1152
Lattice, ionic,
design of for cation diffusion ... 785
Light intensity distribution model,
diffuse 811
Limestones,
reaction of sulfur dioxide and
oxygen with 490
Limiting current method
use in determining
mass transfer coefficients
in packed beds 979
Linear stability theory 934, 937
Liquids, polymeric,
instabilities in processing of ... 209

M

Magnesium sulfate and citric acid,
secondary nucleation of 110
Mass transfer,
effect of internal
circulation in drop
formation on 1090
Mass transfer,
from bubbles or drops with
chemical reactions 925
Mass transfer,
from fluid to sphere
in fixed or fluidized
bed 1147
Mass transfer,
in catalytic reactors 904
Mass transfer,
in liquid-membrane-liquid
systems 175
Mass transfer,
in power law fluids 484
Mass transfer,
of gases through
tubular membranes 1000
Mass transfer, gas phase,
calculation of 383
Mass transfer, turbulent,
in jet flow and bubble flow 607
Mass transfer coefficients,
in packed bed,
by limiting current
method 979
Mass transfer efficiency,
of multipass distillation trays,
model for prediction of 153
Mass transfer rates,
determination of by
moment analysis 961
Mathematical models,
of monolith catalytic converter 331, 343
Mathematical models,
of three-phase distillation 582
Maxwell-Stefan equations,
matrix solution to 383
Melt spinning,
of fibers 923
Melt spinning,
of polymer melts 236
Melt spinning,
onset of draw resonance during 441
Membrane transport 175
Membranes, tubular,
mass transfer of
gases through 1000
Methane-hydrogen system,
compressibility factors for 191
Miscibility,
in system propane-
hexatriacontane 199
Mixing, axial,
effect on mass transfer 456
Mixing, turbulent,
effect of suspended small
particles on 401
Mixing frequencies,
in agitated vessel 289
Mixtures, liquid,
thermal conductivity of 927
Model, computer,
for tubular high-pressure
polyethylene reactors 463
Model, kinetic,
of fluid catalytic cracking 701
Models,
of processes with practical
realization 298
Molar volumes, critical 950
Molding, polymer reaction,
heat transfer and curing in 268
Molecular sieve,
sorption of oxygen, nitrogen,
carbon monoxide, methane
and binary mixtures in ... 753
Moment analysis,
determination of
mass transfer rates 961
Monoethanolamine,
absorption of carbon dioxide into 196

N

Naphthalene,
oxidation of 808
Nitric oxide,
adsorption of in
activated carbon 961
Nitrogen fuel,
fate of in coal char combustion 102
Noncatalytic reactions, gas-solid . 945
Nuclear pressurized
water reactor,
optimization of 1050
Nucleate boiling,
high heat transfer rates in 246
Nucleation,
effect on dropwise condensation 87
Nucleation, secondary,
in mixed suspension crystallizers 110
Nucleation, secondary,
of ice in sugar solutions and
fruit juices 131
Nucleation and nucleus growth,
solid phase reactions by 376

O

Optical isomers,
resolution of 794
Optimization,
by adaptive random search
technique 744
Optimization,
by boundary control 985
Optimization,
of nuclear PWR 1050
Optimization,
of pressure relieving piping
design 471
Oscillations, liquid-column,
effect of pure surfactant on
damping of 603
Oxidation,
of acetic acid,
catalyst for 919
Oxidation,
of acetic acid solutions in trickle
bed reactor 159
Oxygen,
diffusion of in blood 1125, 1133

P

Packed bed reactor,
catalytic,
conversion in 1021, 1027
Packed beds,
biological denitrification in 851
Packed beds,
heat transfer in 198
Packed beds,
mass transfer in 979
Packed beds,
modeling of flow maldistributions
in 600

Papermaking fibers, suspensions of 750
Parametric pumping, equilibrium staged 1055
Parametric pumping, separtion of nonlinearly sorbing solutes by 369
Particle attrition, in shear flow 765
Particles, paramagnetic, capture of from high velocity fluid flow 569
Particles, porous, reaction of gas and solid in 1012
Particulate sedimentation 938
n-Pentane, hydrogenolysis kinetics of 1112
Permeable beds, flow through 194
Pipe, metal, electrostatic characteristics in gas-solids flow in 558
Piping, pressure relieving, optimal design of 471
Plates, flat, forced convection from 264
Polyethylene, solubility of ethylene and other organic solutes in 74
Polyethylene reactors, tubular high-pressure, computer model for .. 463
Polymer processing, instabilities in 209
Polymerization, free-radical, monitoring and estimation of .. 361
Polymers, diffusivities of gases in 724
Polystyrene, solubility of gases and liquids in 117
Porous media, convective instabilities in 168
Porous media, flow of nonlinear fluids through 736
Porous media, prediction of transport properties in 182
Potash alum crystals, growth and dissolution of 887
Power law fluids, flow behavior of in an annulus 617
Practical realization, use in process modeling 298
Precipitation, electrostatic, improvement of efficiency of ... 730
Predictor based ordered search, use in finding optimal separation sequences 970
Pressure drop, in non-Newtonian creeping flow 259
Process design, dynamic 855
Process systems, dynamic, optimal synthesis of 539
Processes, chemical, advanced control of 27
Processes, chemical, design and synthesis of 539
Propane-hexatriacontane system, miscibility in 199
Protein mixtures, fractionation by electropolarization chromatography 779

R

Random search technique, adaptive, use of in optimization problems 744
Reaction, surface, effect of forced and free convection on 252
Reactions, gas-liquid, effectiveness factors in 597
Reactions, gas-solid noncatalytic 945
Reactions, solid phase, kinetics of 376
Reactivity, axial distribution of in fluid-bed contactor 354
Reactors, adiabatic gas-liquid, steady state multiplicity of 324
Reactors, adiabatic gas-liquid, two consecutive, model of 324
Reactors, catalytic, hydrogenation and mass transfer in 904
Reactors, catalytic, fluidized bed, models for 38
Reactors, cooled, minimum cost design of 685
Reactors, gas-liquid, enhancement and effectiveness factors in 604
Reactors, packed-bed, oxidation of naphthalene in ... 808
Reactors, trickle-bed, contacting efficiency in 894
Reactors, trickle-bed, liquid holdup and dispersion in 953
Reactors, trickle-bed, oxidation of acetic acid solutions in 159
Reactors, tubular, optimization by boundary control 985
Reactors, tubular high-pressure polyethylene, computer model for 463
Rectilinear rivulet flow 772
Repeptization 1145
Residence time distribution, in plasticating screw extruders . 122
Residence time distribution, of liquid phase in trickle beds . 612
Residence time distribution, of plate columns 1118
Rheological properties, of suspensions and rigid particles 417

S

Sandstones, acidization of, model of 799
Scopolamine, permeation through human skin 828
Screw extruders, plasticating, residence time distribution in .. 122
Scrubbing, wet, of flue gases 403
Seawater, evaporation of 533
Sedimentation, particulate 938
Separation, of nonlinearly sorbing solutes, by parametric pumping 369
Separation sequence, of multicomponent separation process 970
Separation, solid-liquid, using dual functional filters ... 433
Separators, high gradient magnetic 569
Skin, permeation of scopolamine through 828
Solubility, of ethylene and other organic solutes in polyethylene 74
Solubility, of gases and liquids in polystyrene 117
Solubilization kinetics, of fatty acids in detergents 1006
Solution mapping, use in selection of optimum design variables 55
Solution procedure, for indexed equation sets 549
Sorption, of oxygen, nitrogen, carbon monoxide, methane and binary mixtures in molecular sieve 753
Sphere-in-cell porous media model, trajectory analysis of deep bed filtration with 523
Spray columns, performance characteristics of liquid phase in 456
Spray dryers, design of 713
Stability, of chemical engineering system 855
Stability, linear, theory of 934, 937
Static electrification, of particles in gas-solids pipe flow 558
Styrene, formation of dehydrogenation of ethylbenzene mathematical model of 1097
Sucrose, glycol and glycine, diffusion coefficients of in water 389
Surfactant, effect on velocities of bubble or drop 695
Surfactant, pure, effect on damping of liquid-column oscillations 603
Suspensions, rheological properties of 417
Suspensions, fiber, turbulent drag reduction in ... 669
Suspensions, flowing, diffusion in 691

T

Thermal conductivity, of liquid mixtures 927
Thermoplastic materials, injection flow of 661
Time-delay systems, optimal feedback control of ... 140
Transitions, flow regime, model for prediction of 47
Transport, through boundary layer to permeable wall 407
Transport, turbulent non-Newtonian in tube 1142
Transport processes, prediction of in porous media .. 182

Trickle beds,
residence time distribution of
liquid phase in 612
Tube, circular,
turbulent non-Newtonian
transport in 1142

U

Urea hydrolysis reaction,
steady state kinetics
of 1106
Urease kinetics,
effect of amino acid
additives on 1106

V

Vapor drift velocity,
in two-phase annular flow 283
Vapor-liquid equilibrium data,
by method of intersecting
isochores 399
Velocity profile measurements,
of polymers 947
Viscosity, shear
of amioca starch paste 832
Volume reaction model,
of reaction of gas and
solid in porpous particle 1012
Vortex inhibition 947

W

Wall layer,
height of in annular
flows 990
Waves, equilibrium,
on falling films 867

Z

Zeolite, 13X
diffusion of hydrocarbons in ... 889
